

*Dr Bentz, I just wanted to take a moment to congratulate you on your 30<sup>th</sup> year as a dentist. What a great accomplishment to have in a lifetime! Your dedication to your patients and the pride you take in your work shows in every procedure you do, regardless if it is as small as a filling, or as big as a bridge reconstruction like on Jean Hogg. In my time working with you I have seen tears fall from patients eyes after you give them a new smile, and patients who have dropped to their knees and prayed with thankfulness because you changed their whole look. I have seen you design front teeth out of nothing and the end result is straight out of Hollywood, ... I have seen children who are scared to come in to the treatment room leaving with a smile because of your jokes and the infamous finger trick, the bottom line is you are passionate about being a dentist and you love saving teeth! I have been truly honored to work with you and to watch the transformations that can occur with a pair of skilled hands like yours. You are the best dentist I have ever known and I know that because I watch what you do on a daily basis. I am inspired by your compassion for your patients, and your commitment to your career.*

*Always,*

*Tara Nicole Smith C.D.A*
